

TOPICS COVERED IN THE HTML AND CSS ESSENTIALS EXAM

- Structure and Semantics
 - Understanding the basic structure of an HTML document.
 - Identify and utilize semantic HTML5 elements and when to use them.
- Basic Tags
 - Using tags for text formatting, such as `p`, `h1`-`h6`, `strong`, `em`, etc.
 - Implement essential tags.
- Attributes
 - Apply common attributes such as id, class, src, href, alt, style, title, placeholder, value, type, etc.
- Forms
 - Create forms using `form`, `input`, `textarea`, `select`, `button`, etc.
 - Explain and demonstrate form submission processes (method and action attributes).
- Links and Images
 - Link to other pages or resources using `a` tags.
 - Embed images with `img` tags and handle alternative text (alt attribute).
- Tables
 - Learn to structure tabular data.
- Media
 - Embed multimedia content like audio and video (`audio`, `video`) with fallback options.
- Selectors and Declarations
 - Identify and apply CSS selectors (element, class, ID, attribute selectors) and declaration blocks.
 - Style elements using properties like color, font-size, margin, padding, background, border, etc.

- Box Model
 - Explain the concept of the box model (content, padding, border, margin).
 - Adjust box model properties (width, height, box-sizing, etc.).
- Layout
 - Create basic layouts using CSS (floats, positioning, flexbox, grid).
 - Implement responsive design principles (media queries, fluid layouts).
- Typography
 - Style text with properties like font-family, font-size, font-weight, text-align, line-height, etc.
